

Xu Ji

Research Associate
 Department of Medical Physics, University of Wisconsin-Madison
 1111 Highland Ave, Madison, WI 53705
Email: xji32@wisc.edu

Education

- **Ph.D. in Medical Physics**, University of Wisconsin-Madison 09/2015 - 07/2020
 Thesis: Application of photon counting detectors to x-ray CT systems
 Advisor: Prof. Guang-Hong Chen
- **B.S. in Physics**, Kuangyaming Honors School, Nanjing University 09/2011 - 06/2015
 GPA: 94/100 (3.9/4.0)
 Ranking: 1/80

Research Interests

- Broad interests: X-ray imaging systems and algorithms
- Specific interests: I work on photon counting detector-based x-ray imaging and x-ray differential phase contrast imaging for medical applications.

Experiences

- **Postdoctoral Researcher** 08/2020 - 07/2021
 Department of Medical Physics at UW-Madison
- **Graduate Research Assistant** 08/2015 - 07/2020
 Department of Medical Physics at UW-Madison
 Supervised by Prof. Guang-Hong Chen
- **Graduate Teaching Assistant** Fall semesters in 2017, 2018 & 2019
 Course: Medical Physics 501 - Radiological Physics and Dosimetry
 Instructor: Prof. Guang-Hong Chen & Prof. Wesley Culbertson
- **Visiting Student**, Department of Physics, Duke University 08/2014 - 12/2014

Publications

- Journal publications
 1. **X. Ji**, M. Feng, K. Treb, R. Zhang, S. Schafer and Ke Li, "Development of an integrated C-arm interventional imaging system with a strip photon counting detector and a flat panel detector", IEEE Trans. Med. Imag. (2021).
 2. M. Feng*, **X. Ji***, R. Zhang, K. Treb, A. M. Dinger and Ke Li, "An experimental method to correct low-frequency concentric artifacts in photon counting CT", Phys. Med. Biol. 66 (17) 175011 (2021) (*co-first author)
 3. **X. Ji**, K. Treb, and K. Li. "Anomalous edge response of cadmium telluride-based photon counting detectors jointly caused by high-flux radiation and inter-pixel communication," Phys. Med. Biol., 66 (8) 085006 (2021)

10. **X. Ji**, Y. Ge, R. Zhang, K. Li, and G.-H. Chen, “Low dose performance of a CdTe single photon counting detector and its application in radiation dose reduction for x-ray differential phase contrast imaging,” Oral presentation at RSNA (2016).

Invited Talks

1. “Statistical properties of grating-based x-ray phase contrast imaging,” Presented at Shenzhen Institutes of Advanced Technology, Chinese Academy of Science (2019).

Honors and Awards

- Runner-up, Robert F. Wagner all-conference best student paper award, SPIE Medical Imaging (2020).
- 1st place, Physics of medical imaging student paper award, SPIE Medical Imaging (2020).
- Trainee research prize, RSNA (2017).
- Expanding horizons grant award, AAPM (2016).
- Student travel award, RSNA (2016).
- China National Scholarship (2012).

Services

- Reviewer of IEEE Transactions of Medical Imaging, Medical Physics, Journal of Applied Clinical Medical Physics, etc.

Memberships

- AAPM student member 2016 - 2020

Professional Certifications

- The American Board of Radiology - Medical Physics - Part 1
